

## PROFESSIONAL SUMMARY

Penetration Tester with hands-on experience conducting network, web-application and wireless security assessments. Experienced in reconnaissance, enumeration, vulnerability validation, and technical reporting. Strong understanding of offensive security methodologies and real-world enterprise environments, with a focus on identifying practical attack paths and clearly communicating security risk.

## EDUCATION

**BS Cybersecurity and Information Assurance | WGU**

**2023-2026**

Relevant coursework includes network security, ethical hacking, security testing methodologies, Linux administration, and incident response.

## EXPERIENCE

**Offensive Operations Manager | RedSeer Security**

**July 2024 - Current**

- Conduct external, web application and wireless penetration testing across diverse client environments
- Perform reconnaissance and enumeration to identify vulnerabilities and potential attack paths
- Validate findings and document technical impact and remediation guidance
- Support red team and offensive security engagements under defined scopes

**Security Consultant | RedSeer Security**

**April 2024 – July 2024**

- Assisted with penetration testing activities including reconnaissance, vulnerability analysis, and reporting
- Authored technical findings and collaborated with senior testers on exploit validation
- Supported development of standardized testing and reporting processes

## SKILLS

- Network and Web application penetration testing
- Reconnaissance and enumeration
- Vulnerability validation and analysis
- Linux and Windows Administration
- Security reporting and documentation
- Attention to detail

## CERTIFICATIONS

- CompTIA A+
- CompTIA Net+
- ITIL 4 Foundation
